

Are you an experienced Generator Technician ready to join a new team and grow your career in 2023? ThermFlo is experiencing tremendous growth and we need to add Generator Technicians to our team!

Are you looking for:

- A fulfilling career with an engaging company
- An opportunity to continue to expand your knowledge through our training program
- Company benefits that go beyond the expected

Do you have:

- 5+ years of experience working on ATs and other electrical equipment
- Experience working on standby generators and related equipment to 2 Mw
- A problem-solving mindset
- Natural gas or diesel engine knowledge
- Wiring diagram/schematic proficiency
- Your own tools or ability to obtain tools if offered the position
- Work authorization

Are you:

- Able to pass a DOT physical to drive, as a condition of employment
- A self-starter, organized
- Able to work independently in the field
- Able to work overtime and on weekends when necessary
- Able to drive the company truck

Can you:

- Support 24/7/365 field service operations by serving on the Standby On-call list
- Work in the field service area from Chicago to Aurora, south to Joliet, New Lenox, and Tinley Park
- Conduct a load bank test and perform full PMS
